

# THEMATIC WORKSHOP:

WHERE YOU NEED IT (AND WHERE YOU DON'T) FOR YOUR ISAC

July 13<sup>th</sup>, 2020

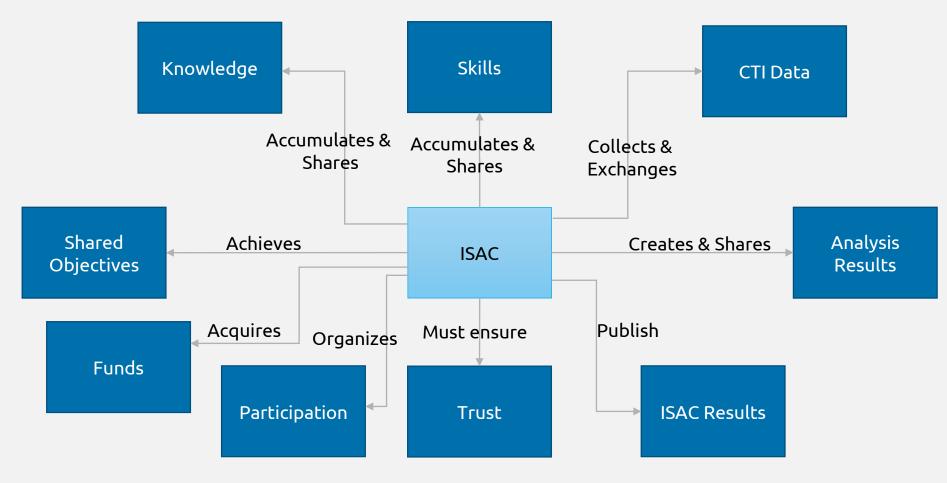

# The Daily Business of an ISAC

This Context Model lists the 'topics and things' (the Business Objects) an ISAC is concerned with. It also states what an ISAC 'does' with those topics and things.

#### Activities Supported by IT Tools

#### **Supported Activities**

The Technical Platform is envisioned as a collection of tools to support ISACs with:

Knowledge Exchange in speech and writing

Information Exchange in digital form

Analysis & Collaboration on cyber threat information and incidents

External Presentation of the ISAC and its results

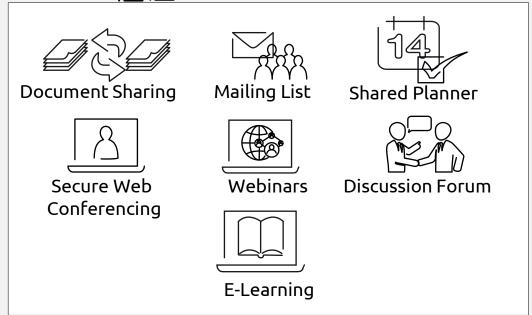

Knowledge Selling to capitalize on the unique expertise of the ISAC

### Generic IT Platform Services (functional level)

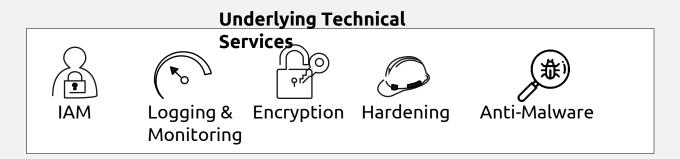

#### **Knowledge Exchange**

# Our educated guess on priorities

#### **Must Have**

IAM
Logging & monitoring
Document sharing
Mailing list

#### **Could Have**

Security data exchange Security event analysis Security event reporting What do YOU think?

And tell us WHY!

#### Might Have

Secure Web conferencing
Shared planner
Discussion forum
Webinars
Public website
Business reporting
Knowledge selling
E-learning

# Questions to you, dear attendants

Which of the services do YOU need to be made available first? Which services would be priority for you?

Which of the IT Services do you NOT need? And why?

Which service that YOU think is crucial, is not listed on in the platform?
